HARDO LOCKSTITCH- SEWING MACHINES

The Lockstitch-Sewing Machine sews with 2 threads, i.e. one upper and one lower thread. The knotting of the two threads is in the middle of the sewn material.

An automatic high-precision thread brake ensures very strong thread feeding which is only possible for quilting and sink stitch seams. Thanks to this the seam will not undo even if the sole has been worn down, it is not bulky, does not press on sensitive feet, and the shoe keeps its full flexibility.

Modifications reserved 06/20

- Stitch length from 3 to 14 mm
- Max. stitch thickness 27 mm
- Max. number of stitches = 160 stitches/min.
- Colour: light-grey RAL 7035
- Electr. specifications: 400V/3Ph/50Hz/0,75kW
- Dimensions: 620 × 750 × 1640 mm (wxdxh)
- Weight: 195 kg
